

Synthetic Marine Grease

Super S[®] Synthetic EP Marine Grease

Ultimate Performance for Boat Trailer Wheel Bearings and Marine Applications

Super S Synthetic EP Marine Grease is the best grease for:

- Rust & Corrosion Protection
- Saltwater Applications
- Wear Protection

It is Highly Resistant to Washout.

It is Specially Formulated for Severe Service.

The unequalled performance of Super S Calcium Sulfonate Extreme Pressure NLGI Grade #2 Synthetic Grease makes it the best choice for Marine and other applications needing severe service properties and/or a high resistance to washout, water, moisture, rust and corrosion. It demonstrates exceptional anti-wear properties, and oxidation and shear stability, provides outstanding low and high temperature performance and maximizes component life. It is a multipurpose grease meeting the requirements of NLGI GC/LB.

SUS 205 50/14oz tubes

Super S Synthetic EP Marine Grease

- exceptional Extreme Pressure and anti-wear properties
- excellent oxidation and shear stability
- for severe service, temperature extremes
- for marine, wet and extreme environments
