

Super S[®] Cotton Picker Spindle Cleaner

TECHNICAL PRODUCT INFORMATION

Super S Cotton Picker Spindle Cleaner

Super S Cotton Picker Spindle Cleaner is superior to soap and water for cleaning spindles. It is a top quality product based upon the time-tested formulation specifically developed for cleaning modern cotton picker spindles to help reduce down time, service, and provide a higher yield of cleaner cotton.

Super S Cotton Picker Spindle Cleaner is a water soluble oil-based liquid that mixes well with water of any hardness. It applies a protective film as it washes the spindle, cleaning dirt, plant materials, and other foreign contaminants from cotton picker spindles and components. It guards against wear, pitting, rust, corrosion and oxidation, keeps moisture pads from drying out and hardening, and helps to keep doffers in good condition. It's compatible with spindle grease, so it won't wash spindle grease out of the critical areas it's lubricating, but will still coat those parts to protect them.

FEATURES/ BENEFITS

- Mixes well with all water hardness
- Non-flammable when mixed with water
- Keeps spindles cleaner - cleans and washes away dirt, plant juices and materials, and other foreign contaminants from spindle and components
- Guards against wear and pitting
- Reduces wrapping and staining
- Protects against rust, corrosion and oxidation
- Helps to keep moisture pads from drying out and hardening
- Helps to keep doffers in good condition
- Higher yield of cleaner cotton

DIRECTIONS

1. Clean moistener system of wetting agents and cleaners, fill moistener tank 1/2 of water.
NOTE: WATER AND CLEANER DO NOT MIX IF WATER Poured INTO CLEANER.
2. Agitate the water by operating the moistener control water system. This recirculates the water back to the supply tank.
3. While water is agitating, slowly add spindle cleaner to the water at a ratio of one gallon of cleaner to 64 gallons of water.
4. Finish filling the tank with water while agitating. Agitate for an additional 5 minutes.

SPECIAL HANDLING, NOTICES OR WARNINGS

NOTE:

For best results the mixture should be used within 24 hours. If mixture is allowed to stand for extended time, agitate for several minutes before picking. Additional cleaner can be added for make up in a tank already containing some previous mixture. If tank is less than half full, fill with plain water to half full. Follow mixing directions and add cleaner at the correct ratio for the amount of water being added for make up.

STORAGE:

Drums and pails of spindle cleaner concentrate should be stored to avoid contamination with water. If water gets into the drum or pail, it will cause curdling. If necessary to store outside, place drums on side with bungs at 3 and 9 o'clock position.

TYPICAL CHARACTERISTICS

Super S[®] Cotton Picker Spindle Cleaner		
<i>Property</i>	<i>Test Method ASTM -D</i>	<i>Typical Properties</i>
Specific Gravity	4052	1.002
Flash Point °C/ °F	92	148/300
Fire Point °C/ °F	92	177/350
Pour Point °C/ °F	97	-17.8/0
Viscosity cSt @ 40°C SUS @ 40°C	445	22.0 108.4
Color	1500	2

Typical test data are average values only.
 Minor variations which do not affect product performance are to be expected during normal manufacturing.
