

# Super S<sup>®</sup> Super Power Car Wash

**Super S<sup>®</sup> Super Power Car Wash** is a super concentrated blend of chemically engineered surfactants specifically designed to easily remove tough road grime typically found on cars, light-duty trucks, and vans. The high friction detergent system gently penetrates and removes dirt, oil, grease, bug splatter, and road film from the vehicle's surface with minimum scrubbing keeping your automobile looking "like new". It is safe on all surfaces, painted or otherwise. Better results will be obtained with hot or warm water, however, it works well in cold water.

**Super S<sup>®</sup> Super Power Car Wash** uses a technologically advanced system of high activity surfactants and alkali which create a robust, thick, dense lather that deep-cleans and conditions automotive finishes. Various dish-washing liquids and "soaps" can harm your auto-finish. The powerful, pH balanced blend of surfactants is strong enough to easily wash away typical road grime without removing wax or dulling the paint.

The gentle surfactant system in **Super Power Car Wash** make is safe for use even on the most exotic clear coat finishes. It will not dull paint or remove wax. The included optical brighteners deliver rich, deep shine and lasting protection for all types of paint. The extreme lubrication properties encapsulate and dissolve tough soils allowing to safely wipe away for a scratch-free finish. The super sudsy formula has excellent foam regeneration properties for multi-vehicle use where desired.

**Super S<sup>®</sup> Super Power** automotive wash solutions are engineered to handle challenging cleaning conditions. Most operators are not aware of the complicated chemical reactions which take place throughout the cleaning process of automotive finishes. Identifying which variables are affecting your car wash is only half the battle. Common culprits, such as organic or inorganic soil, water quality, seasonal temperatures, severe weather changes, pollution, and road conditions can be overlooked. Each **Super Power** car wash product is optimized through a series of lab experiments and on-site tests followed by extensive field testing in a real-world environment to ensure maximum performance and protection is achieved.

## Features

- Easily cuts through the most stubborn soils
- Excellent performance in cold water; hard water stable
- Excellent suds regeneration
- Environmentally friendly, biodegradable formula
- High lubricity for a slick finish that encapsulates grime and safely washes away for a scratch free finish
- Concentrated, economical formula
- Optimized pH for safe hand washing
- Contains no solvents (VOC compliant)

## SURFACE APPLICATIONS

For exterior washing/cleaning of clear coat, single stage, acrylic, lacquers, enamels, as well as powder-coated paints. Also cleans glass, chrome, plastic, vinyl, rubber, wheels, tires, and more.

Technical data on page 2

# Super S<sup>®</sup> Super Power Truck Wash

**DIRECTIONS:**

1. Hose off vehicle to remove loose dirt
2. Dilute at a rate of 2 oz. per gallon of water
3. Shampoo vehicle with a clean sponge, wash mitt, or other vehicle wash brush
4. Rinse thoroughly with a moderate stream of water

**HELPFUL TIPS:**

Use on cool surfaces. To quickly cool the surfaces, rinse entire vehicle with pressurized water before use. This will also help to loosen and remove dirt. It is best to use a separate wash mitt or sponge on the lower body areas, fender wells, wheels, and tires. This way, if you pick up any small rocks and dirt, it won't scratch the painted areas.

**Typical Characteristics**

<i>Properties</i>	<i>Typical Results</i>
Physical Form	Thick, water based liquid
pH	6.5-7.5
Color	Pink
Odor	Pleasant/Fruity
Specific Gravity	1.01

Typical test data are average values only.  
 Minor variations which do not affect product performance are to be expected during normal manufacturing.

**SPECIAL HANDLING, NOTICES OR WARNINGS**

Eyes: Completely flush for 15 mins with water occasionally lifting the upper and lower eye lids.  
 Inhalation: Move exposed person to fresh air.  
 Ingestion: Do not induce vomiting, call a physician immediately.
