

Sea-Wash® 8 Non-Flammable Degreaser pH 7

Sea-Wash® 8 Non-Flammable Degreaser is a neutral pH, biodegradable replacement for mineral spirits. The aqueous based cleaning solution was developed as a safe alternative for use in metal parts cleaning equipment. **Sea-Wash® 8** is an industrial strength, environmentally safe, alternative to volatile solvents that efficiently removes dirt, mold, algae, oil, grease, and other soils from the surface of all metals, plastics, and many other materials. Most aqueous based cleaning require heating to efficiently remove tough soils, but Sea-Wash® 8 is able to remove the same soils with or without heating lending to its cost-effectiveness. This allows for an inexpensive conversion from solvent to aqueous based cleaning solutions.

Sea-Wash® 8 Non-Flammable Degreaser has excellent buffering capacity holding its neutral pH even upon dilution. Unique wetting action clings to the surface leaving parts cleaner than most solvents. Although paint may be removed, Sea-Wash® 8 contains inhibitors that form a protective layer preventing rust formation. Consistent cleaning efficiency, unlike solvent, which become filled with soils and degrade over time. Save money, improve worker safety, and reduce the headache surrounding reporting and disposal issues.

FEATURES/BENEFITS

- Safe for use in heated or non-heated parts washer
- Contains rust inhibitors
- Contains no harmful additives such as organic solvents, acids or terpenes/d-limonenes
- Broad application range - safe for use in household cleaning and strong enough for tough industrial jobs
- Non-toxic, Non-caustic, Non-flammable, Biodegradable and Environmentally sensitive
- Safe for multi-material parts
- Self-cleaning solution - no scrubbing required
- Unique wetting action cleans to the surface leaving parts cleaner than volatile solvents

TYPICAL CHARACTERISTICS

Sea-Wash® 8 Non-Flammable Degreaser	
Property	
Appearance / Odor	Clear/ N/A
Boiling Point °F	214
Specific Gravity	1.051
Solubility in Water	Infinite
pH	7.0

FOR USE ON:

Mold
Dirt
Oil
Carbon Dust
Grease
Algae

Typical test data are average values only.

Minor variations which do not affect product performance are to be expected during normal manufacturing.

DILUTION RATIO

5% Sea-Wash to 95% Water

1 Qt makes 5 G Ready to Use

1 1/2 G makes 30 G Ready to Use

Mixture should be 19 parts water to 1 part Sea-Wash 8

Sea-Wash® 8 Non-Flammable Degreaser Neutral pH 7 is recommended for use in metal parts cleaning equipment with or without heating.
